E-commerce Website MERN Stack with Razorpay Integration and Spring Boot Admin Panel

Designed and developed a comprehensive Online E-Commerce Website, leveraging the MERN (MongoDB, Express.js, React.js, Node.js) stack for the frontend and backend. The project includes advanced features such as a secure payment gateway using Razorpay and an efficient admin panel powered by Spring Boot.

Key Achievements:

Frontend Development:

Implemented a responsive and intuitive user interface using React.js.

Backend Development:

Designed and developed RESTful APIs using Node.js and Express.js to handle products. Utilized MongoDB for database management.

Payment Gateway Integration:

Integrated Razorpay for secure and efficient online transactions, enhancing the user experience during the checkout.

Admin Panel with Spring Boot:

Designed and implemented an admin panel using Spring Boot, allowing administrators to manage inventory, user accounts, and orders efficiently.

BookStore MERN Stack

Developed a dynamic and user-friendly Online Bookstore Website using the MERN MongoDB, Express.js, React.js, Node.js) stack. This project showcases my proficiency in full-stack development and incorporates a range of technologies to deliver a seamless user experience.

Key Achievements:

Frontend Development:

Implemented a responsive and intuitive user interface using React js, enhancing the overall user experience.

Backend Development:

Designed and developed RESTful APIs using Node.js and Express.js to handle book inventory. Utilized MongoDB for database management.
